V000000010	cylinder according to Directive 2014/34/EU Please note: The assembled servo valve R901038987- 4WS2EM6-2X/10B11XNET315K17EV-100 can no longer be used. The following version can be used as a functional replacement be used: 4WS2EM6-2X/10B11XLET315K17EV-100 (R901508361) The following should be noted for the XL valves of nominal size 6: (1) Please note the differences in dimensions. See data sheet 29564-XL versus data sheet 29564-XN. On size 6 XL valves, the cap is longer (+11mm). (2) A control may only be made from intrinsically safe Circuit with the electrical maximum values (see data sheet information). The user can achieve this by Installs safety barrier between amplifier and valve. See examples (parallel connection or individual control) as a suggestion in data sheet 29564-XL.

AR902487569	A A10VSO 71 DR /31L-VPA42N00 AXIAL PISTON PUMP The connection plate 12 of the A10 size 71 is no longer available. At the high-pressure connection "B" could be both a SAE 1" and a SAE 1 1/4" flange can be installed. The following types are supplied with connection plate 42 (SAE 1" connection). For replacement delivery in existing systems, the Successor type optionally also with Connection plate 44 (SAE 1 1/4" connection) to be delivered. In the version with connection plate 44 the pressure regulator can be set to a maximum of 250 bar. The higher quality FKM seals (identification "V" in the type code). used as standard seals on the A10, which means no additional costs for you develop
